

Edelweiss Alternatives and Japan's JEXWAY come together to share Transport Infrastructure solutions in India

Mumbai, October 7, 2026: Edelweiss Alternatives and Japan Expressway International Co., Ltd. ("JEXWAY"), a leading infrastructure investment and management company backed by Japan's major expressway companies have entered into an arrangement for the exchange of global practices and expertise to develop and implement effective solutions for the management of highway and transport assets across both Japan and India.

This arrangement comprises two complementary pillars: a high-conviction capital investment by JEXWAY in Citius TransNet Investment Trust ("Citius TransNet"), managed by EAAA TransInfra Managers Limited, and exchanging technical services with Sekura India Management Limited ("SEKURA"), an asset operating and management platform of Edelweiss Alternatives.

SEKURA and **JEXWAY** would engage in a structured, long-term arrangement to facilitate two-way exchange of advanced technical solutions and operational practices across highway and transport assets. This exchange will combine JEXWAY's extensive experience in operating some of the world's most advanced expressway networks with SEKURA'S operating capabilities of infrastructure assets in India.

Amit Agarwal, Chief Executive Officer, EAAA India Alternatives Limited said, "India's transport infrastructure is evolving rapidly, with increasing focus on scale, efficiency and long-term asset management. Japan's deep experience combined with India's scale, provides an opportunity to apply these practices in a dynamic market."

Sreekumar Chatra, Managing Director of the Infrastructure Yield Funds, EAAA India Alternatives Limited said, "We are delighted to associate with JEXWAY. This further strengthens our local capabilities by integrating global operational expertise through a meaningful two-way exchange of knowledge. JEXWAY's investment in Citius TransNet is a validation of its quality and potential."

SUZUKI Toru, President, Japan Expressway International Co., Limited said, "India represents a compelling long-term growth opportunity, driven by the continued expansion of its highways and transport infrastructure sector. Our investment in Citius TransNet reflects our commitment to this growth story. Through our arrangement with SEKURA, the operating and management platform of Edelweiss Alternatives, we are partnering with an experienced investment manager with a proven track record and institutional grade governance standards."

Edelweiss Alternatives is one of the leading alternative asset management platforms in India and comprises eight verticals including infrastructure yield sub-strategy commercial office, special situations and performing credit. The portfolio across these strategies includes 1.73 Gigawatts of solar assets, 4,586 lane kilometers of roads, 3.10 million square feet of office space and 1,835 circuit kilometers of transmission lines. The private credit business vertical has also managed* 190 investments amounting to ~₹424 billion.

JEXWAY has extensive experience in developing, investing and operating transport infrastructure primarily across southeast Asia. It has invested in public-private partnership (PPP) projects across Indonesia, Vietnam, Philippines, and in India, while also providing specialized asset management services in highway infrastructure, through its affiliates.

About Edelweiss Alternatives:

Edelweiss Alternatives is one of the leading alternatives platforms in India, with more than 17 years of experience of managing long term patient capital with a Fee-Paying Assets Under Management (FPAUM) of approximately ₹48,623 crore. The platform operates a diversified, multi-strategy platform, in large, under tapped and fast-growing alternative asset classes, focusing on providing income and yield solutions to its clients.

The wholly owned subsidiary, Sekura India Management Limited ("Sekura"), is part of the asset operating and management team and supports various business verticals, including operations, maintenance, monitoring, efficiency improvement, and turnaround management.
